Fall 2020 ENG 5300 Test 1 Ferris Kimmil

You must show **all** work to receive full credit. All work is to be your own.

Oct 19 2020
This is a closed books and notes test. Be organized. Total points: **100**Submit to BB a single b/w pdf file, named using your last name. emailed solutions won't be graded

1. §10.1 Line Integral. Work done by a force. Calculate $\int_C \mathbf{F}(\mathbf{r}) \cdot d\mathbf{r}$ for the following data. If \mathbf{F} is a force, this gives the work done in the displacement along C. (Show the details.) 10 points $\mathbf{F} = \sin x \, \mathbf{i} + \cos y \, \mathbf{j} + xz \, \mathbf{k}$, $C : \mathbf{r}(t) = t^3 \, \mathbf{i} - t^2 \, \mathbf{j} + t \, \mathbf{k}$ from (0,0,0) to (1,-1,1).

 $2. \ \S 10.2 \ \text{Show the form under the integral sign is exact in space and evaluate the integral. Show the details of your work. } 10 \ \text{points}$

$$\int_{(5,3,\pi)}^{(3,\pi,3)} (\cos yz \, dx - xz \sin yz \, dy - xy \sin yz \, dz)$$

 $3.~\S 10.4$ Evaluation of Line Integrals by Green's Theorem.

Using Green's Theorem, evaluate $\int_C y^3 dx - x^3 dy$ counterclockwise around the boundary curve

C of the region R, where C is the circle $x^2 + y^2 = 4$.

20 points

4. §10.6 Flux Integrals (3) $\iint_S \mathbf{F} \cdot \mathbf{n} \, dA$ Evaluate the integral for the given data. Describe the kind of surface. Show the details of your work. 20 points $\mathbf{F} = [0, \sinh z, \cosh x], \, S : \, x^2 + z^2 = 4, \, \, 0 \le x \le \sqrt{2}, \, \, 0 \le y \le 5, \, z \ge 0$

5. §10.7 Application of the Divergence Theorem: Surface Integrals $\bigoplus_{c} {\bf F} \cdot {\bf n} \, dA$

20 points

Evaluate the surface integral $\iint_S \mathbf{F} \cdot \mathbf{n} \, dA$ by the Divergence Theorem. Show the details.

 $\mathbf{F} = [3xy^2, xe^z, z^3], S$ is the surface of the solid bounded by $y^2 + z^2 = 1$ and x = -1, and

6. $\S 10.9$ Evaluation of $\oint_C \mathbf{F} \cdot \mathbf{r}' \, ds$

20 points

Calculate this line integral by Stokes's theorem for the given \mathbf{F} and C. Assume the Cartesian coordinates to be right-handed and the z-component of the surface normal to be nonnegative. Show the details.

 $\mathbf{F}=[z,\,e^z,\,0],\,C$ the boundary curve of the portion of the cone $z=\sqrt{x^2+y^2},\,x\geq0,\,y\geq0,\,0\leq z\leq1$
